---

**GENERAL RESPONSIBILITIES:**

Installation, operation, repair and maintenance of all instruments and instrument-related equipment in the sugar production facilities (main milling facility, power generation and other related facilities). As this involves various types of mechanically related operations, some personal tools are required for this position.

**SPECIFIC DUTIES AND RESPONSIBILITIES:**

Including, but not limited to, installation, start-up procedures, operation (including calibration), troubleshooting, repair, maintenance of instrument devices (temperature sensors, pressure sensors, flow sensors and levels sensors), valves, controllers, transmitters, positioners, PLC's and HMI's. As well, install, troubleshoot and maintain all pneumatic, electronic and hydraulic lines through the sugar production facilities.

**OTHER DUTIES MAY INCLUDE:**

Any/all other tasks as may be assigned.

**EQUIPMENT / TOOLS USED:**

Forklift, hoist, voltage tester, various hand & power tools, computer, calibration equipment, handheld configurator and tape measure.

**LICENSES REQUIRED:** none

**KNOWLEDGE, SKILLS AND ABILITIES:**

High school diploma (or GED), 1 to 3 years of Applied Training / Trade School, with 3 to 5 years of experience in all phases of instrumentation. Must have Journeyman level skills in instrumentation, intermediate computer skills and basic electrical skills. Must be able to read and interpret diagrams, sketches / drawings, blueprints, schematics and manuals. Must be able to work in sitting, walking, kneeling, crawling, climbing and reaching and overhead positions. Must also be able to work in confined spaces. Must be able to lift over 25 lbs. and up to 50 lbs. on a frequent basis.
